## INSTRUCTION MANUAL

---

Additional information on products, accessories, replacement parts and services can be found at  
**www.neff-international.com** and in the online shop  
**www.neff-eshop.com**

---

### Intended use

Read these instructions carefully. Only then will you be able to operate your appliance safely and correctly. Retain the instruction manual and installation instructions for future use or for subsequent owners.

The appliance can only be used safely if it is correctly installed according to the safety instructions. The installer is responsible for ensuring that the appliance works perfectly at its installation location.

This appliance is intended for domestic use and the household environment only. The appliance is not intended for use outside. Do not leave the appliance unattended during operation. The manufacturer is not liable for damage which is caused by improper use or incorrect operation.

This appliance is intended for use up to a maximum height of 2000 metres above sea level.

This appliance may be used by children over the age of 8 years old and by persons with reduced physical, sensory or mental capacity or by persons with a lack of experience or knowledge if they are supervised by someone who is responsible for their safety, or have been instructed in how to use the appliance safely and have understood the risks involved in not using it properly.

Children must not play with the appliance. Cleaning and user maintenance must not be performed by children unless they are over 15 years of age and are supervised. Keep children below the age of 8 years old at a safe distance from the appliance and power cable.

Check the appliance for damage after unpacking it. Do not connect the appliance if it has been damaged in transport.

This appliance is not intended for operation with an external clock timer or a remote control.

## **Important safety information**

### **Warning – Danger of suffocation!**

Packaging material is dangerous to children. Never allow children to play with packaging material.

### **Warning – Risk of fire!**

- Fatty deposits in the grease filter may catch fire. Regularly clean the grease filter. Never operate the appliance without a grease filter.
- Grease deposits in the grease filter may catch fire. Never work with naked flames close to the appliance (e.g. flambéing). Do not install the appliance near a heat-producing appliance for solid fuel (e.g. wood or coal) unless a closed, non-removable cover is available. There must be no flying sparks.
- Hot oil and fat can ignite very quickly. Never leave hot fat or oil unattended. Never use water to put out burning oil or fat. Switch off the hotplate. Extinguish flames carefully using a lid, fire blanket or something similar.
- When gas burners are in operation without any cookware placed on them, they can build up a lot of heat. A ventilation appliance installed above the cooker may become damaged or catch fire. Only operate the gas burners with cookware on them.
- Operating several gas burners at the same time gives rise to a great deal of heat. A ventilation appliance installed above the cooker may become damaged or catch fire. Never operate two gas burners simultaneously on the highest flame for longer than 15 minutes. One large burner of more than 5 kW (wok) is equivalent to the power of two gas burners.

### **Warning – Risk of burns!**

The accessible parts become very hot when in operation. Never touch hot parts. Keep children at a safe distance.

### **Warning – Risk of injury!**

- Components inside the appliance may have sharp edges. Wear protective gloves.
- Items placed on the appliance may fall down. Do not place any objects on the appliance.
- The light emitted by LED lights is very dazzling, and can damage the eyes (risk group 1). Do not look directly into the switched on LED lights for longer than 100 seconds.

### **Warning – Risk of electric shock!**

- A defective appliance may cause electric shock. Never switch on a defective appliance. Unplug the appliance from the mains or switch off the circuit breaker in the fuse box. Contact the after-sales service.
- Incorrect repairs are dangerous. Repairs may only be carried out and damaged power cables replaced by one of our trained after-sales technicians. If the appliance is defective, unplug the appliance from the mains or switch off the circuit breaker in the fuse box. Contact the after-sales service.
- Do not use any high-pressure cleaners or steam cleaners, which can result in an electric shock.

## **Causes of damage**

### **Caution!**

Risk of damage due to corrosion. Always switch on the appliance while cooking to avoid condensation. Condensate can produce corrosion damage.

Always replace faulty bulbs to prevent the remaining bulbs from overloading.

Risk of damage due to ingress of humidity into the electronic circuitry. Never clean operator controls with a wet cloth.

Surface damage due to incorrect cleaning. Clean stainless steel surfaces in the direction of the grain only. Do not use any stainless steel cleaners for operator controls.

Surface damage due to strong or abrasive cleaning agents. Never use strong and abrasive cleaning agents.

Risk of damage as a result of incorrect loading of design elements. Do not pull design elements. Do not place objects on the design elements or hang objects from them.

## Environmental protection

Your new appliance is particularly energy-efficient. Here you can find tips on how to save even more energy when using the appliance, and how to dispose of your appliance properly.

### Saving energy

- During cooking, ensure that there is a sufficient supply of air to enable the extractor hood to work efficiently and with a low level of operating noise.
- Adjust the fan speed to the amount of steam produced during cooking. Only use intensive mode when required. The lower the fan speed, the less energy is consumed.
- If cooking produces large amounts of steam, select a higher fan speed in good time. If the cooking steam has already spread around the kitchen, the extractor hood will need to be operated for longer.
- Switch off the extractor hood if you no longer require it.
- Switch off the lighting if you no longer require it.
- Clean and (if required) replace the filter at regular intervals in order to increase the effectiveness of the ventilation system and to prevent the risk of fire.
- Put the lid on to reduce cooking steam and condensation.

## Operating the appliance

These instructions apply to several appliance variants. It is possible that individual features are described which do not apply to your appliance.

**Note:** . Switch on the extractor hood when you start cooking and switch it off again several minutes after you have finished cooking. This is the most effective way of removing the kitchen fumes.

### Control panel

| Symbol | Explanation                               |
|--------|---|
| ①      | Fan on/off                                |
| vol    | Noise reduction function                  |
| fresh  | AirFresh function                         |
| -      | Decrease fan setting                      |
| +      | Increase fan settings/intensive mode 1, 2 |
| P      | Intensive mode 2 shortcut                 |
| R      | Automatic mode                            |
| Ā      | Light on/off/dimming                      |

### Environmentally-friendly disposal

Dispose of packaging in an environmentally-friendly manner.

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

## Setting the fan

### Switching on

- Touch the  symbol.
- The fan starts at setting .
- Touch + or - to alter the fan speed.

### Switching off

Touch the  symbol.

## Noise reduction function

The noise reduction function reduces the fan noise.

### Switching on

**Note:** This function can be used at any fan setting except fan setting . The function will remain active even after the fan is switched off.

Touch the  symbol.

### Switching off

Touch the  symbol.

## AirFresh function

### Switching on

Touch the  symbol.

**fresh** will be shown on the display panel. The fan runs for approximately 5 minutes per hour at fan setting 1.

### Switching off

Touch the  symbol.

This ends the AirFresh function.

## Intensive setting

You can use the intensive setting if there is a large build-up of odours and fumes/vapours.

### Switching on

Touch the  symbol.  will light up on the display. Touch the  symbol again to switch back to intensive mode .

**Note:** After approx. 6 minutes, the extractor hood automatically switches back to fan setting 3.

### Switching off

If you want to end intensive mode before the preset time expires, touch the  symbol.

## Automatic mode

### Switching on the appliance

- Press the  button.
- The fan starts at  setting.
- Press the  button.
- The optimum fan setting ,  or  is automatically set via a sensor.

## Switching off the appliance

Press the  or  button to switch off automatic mode. The fan switches off automatically if the sensor no longer detects a change in the air quality of the room. The automatic mode lasts 4 hours at most.

## Sensor control

In automatic mode, an automatic air sensor in the extractor hood detects the intensity of the cooking and roasting odours. Depending on the setting of the automatic air sensor, the fan automatically switches itself to another fan setting.

Possible sensor settings:

Default sensitivity setting: 

Lowest sensitivity setting: 

Highest sensitivity setting: 

If the sensor controller responds too strongly or not enough, it can be changed accordingly:

1. Touch and hold the  symbol for 1 second when the fan is switched on. The setting will be displayed.
2. The sensor controller setting can be changed by touching the + or - symbol.
3. Take your finger off the  symbol.

## Lighting

The lighting can be switched on and off independently of the fan.

Touch the  symbol.

### Setting the brightness

Press and hold the  symbol until the required brightness is reached.

## Saturation display

If the metal grease filters or activated charcoal filter are/is saturated, the corresponding symbols will flash once the appliance has been switched off:

- **Metal grease filter:**  
- **Activated charcoal filter:**  
- **Metal grease filter and activated charcoal filter:**  

If you have not yet done so, the metal grease filters should now be cleaned or the activated charcoal filter replaced. → "Cleaning and maintenance" on page 9

The saturation indicators can be reset while they are flashing. To do this, touch the - symbol.

### Switching over the display for air recirculation mode

For air recirculation mode, the electronic controller must be switched over accordingly:

- The extractor hood must be connected and switched off.
- Touch and hold the  symbol and touch the + or - symbol until "2" lights up for air recirculation mode (filters that cannot be regenerated). Take your finger off the  symbol. This will switch the electronic controller over to air recirculation mode (filters that cannot be regenerated).

- Touch and hold the symbol and touch the + or - symbol until "3" lights up for air recirculation mode (filters that can be regenerated). Take your finger off the symbol. This will switch the electronic controller over to air recirculation mode (filters that can be regenerated).
- Repeatedly touching and holding the symbol and touching the + or - symbol until "1" lights up switches the electronic controller back over to air extraction mode.

## Audible signal

### Switching on

Touch and hold the and symbols at the same time for approximately 3 seconds when the fan is switched on. An audible signal will sound as an acknowledgement.

When the signal tone is activated, will be lit.

### Switching off

Touch and hold the and symbols at the same time for approximately 3 seconds when the fan is switched on. An audible signal will sound as an acknowledgement.

When the signal tone is deactivated, will be lit.

## Connecting to a hob

You can connect this appliance to a hob (if the hob supports connection to the appliance) and then control the functions of the hood via your hob.

Appliances can be connected to each other in different ways:

### Home Connect

Two appliances can be connected using the Home Connect app provided that both of them are Home Connect compatible.

Refer to the Home Connect documents supplied for more information.

### Connecting appliances directly

If the appliance is connected directly to a hob, it cannot be connected to your home network as well. The appliance will function as an extractor hood that is not connected to the network and you can continue to operate it via the control panel.

### Connecting appliances via your home network

If the appliances are connected to each other via your home network, both the hood controls on the hob and Home Connect can be used to operate the appliance.

#### Notes

- Make sure you follow the safety instructions in the instruction manual for your extractor hood and that these are complied with even when operating the appliance via the hood controls on the hob.
- If the extractor hood is being operated by means of the controls on the hood itself, this mode of operation always has priority. It is not possible to use the hood controls on the hob during this time.

### Setting up a connection

To connect the hob to the extractor hood, the hood must be switched on.

Make sure that the hob is switched on and is in search mode.

To do this, refer to the section entitled "Connecting to the extractor hood" in the instruction manual for your hob.

### Connecting directly

#### Notes

- Before connecting the appliance, reset all existing connections to the WiFi or other appliances.
- If your extractor hood is connected directly to the hob, it cannot be connected to your WiFi as well and you will not be able to use Home Connect.

Press and hold the and symbols at the same time until the and - indicators start flashing.

The extractor hood has been connected to the hob when the symbol stops flashing and remains continuously lit.

## Connecting via your home network

### Notes

- You require a router that has WPS functionality.
  - You require access to your router.
  - The extractor hood cannot be switched on during the connection process. You can cancel the process at any time by pressing the **I** symbol.
  - In the networked standby mode, your appliance requires a maximum of 2 W.
1. Press and hold the **I** and **P** symbols at the same time until the  and **-** indicators start flashing.
  2. Tap the **+** symbol to start automatic login to your home network.  and **/** will flash.
  3. Press the WPS button on the router within the next 2 minutes.

Once the connection to your home network has been established, the extractor hood will connect to the hob automatically.  and **3** will flash.

The connection process is complete when the  indicator stops flashing on the control panel and remains continuously lit.

**Note:** . The connection can only be established when both appliances are connected to your home network and are in search mode. If the time allowed for search mode has already expired for one of the two appliances, start the search again.

## Setting up

To implement settings via Home Connect, you must have installed and set up the Home Connect app on your mobile device.

Refer to the Home Connect documents supplied for more information.

The app will guide you through the entire registration process. Follow the steps specified by the app to implement the settings.

The app must be open in order to perform the set-up process.

**Note:** In networked standby mode, your appliance requires a maximum of 2 W.

## Automatic registration in the home network

### Notes

- You need a router that has WPS functionality.
- You need to be able to access your router. If you do not have this, follow the steps for "Manually logging into your home network".
- The extractor hood cannot be switched on during the connection process. You can cancel the process at any time by pressing the **I** symbol.
- To connect the extractor hood to your home network, the extractor hood must be switched on.

1. Press and hold the **I** and **P** symbols at the same time until the  and **-** indicators start flashing.
  2. Tap the **+** symbol to start automatic login to your home network.  and **/** will flash.
  3. Press the WPS button on the router within the next 2 minutes.
- If the extractor hood has successfully connected, it will automatically connect to the Home Connect app.  and **3** will flash.

**Note:** If the extractor hood has been unable to connect, it will automatically allow you to manually connect to your home network.  and **2** will flash. Log the appliance into your home network manually or tap **-** to try logging in automatically again.

4. On your mobile device, follow the instructions for automatic network login.

The login process is complete when the  indicator stops flashing on the control panel and remains continuously lit.

## Manual registration in the home network

### Notes

- The extractor hood cannot be switched on during the connection process. You can cancel the process at any time by pressing the **I** symbol.
- To connect the extractor hood to your home network, the extractor hood must be switched on.

1. Press and hold the **I** and **P** symbols at the same time until the  and **-** indicators start flashing.
2. Tap the **+** symbol twice to manually log into your home network.  and **2** will flash.

- Use the "Home Connect" SSID and the "Home Connect" key to log your mobile device into the extractor hood network.

If the extractor hood has successfully connected, it will automatically connect to the Home Connect app.

and will flash.

- On your mobile device, follow the instructions for manually logging into your network.

The login process is complete when the indicator stops flashing on the control panel and remains continuously lit.

### Connecting to the app

If the Home Connect app is installed on your mobile device, you can connect it to your extractor hood.

#### Notes

- The appliance must be connected to the network.
- The app must be open.

- Press and hold the and symbols at the same time until the and indicators start flashing.
- On your mobile device, follow the instructions in the Home Connect app.

The connection process is complete when the indicator stops flashing on the control panel and remains continuously lit.

### Software update

Using the software update function, your extractor hood's software can be updated (e.g. for the purpose of optimisation, troubleshooting or security updates). To do this, you need to be a registered Home Connect user, have installed the app on your mobile device and be connected to the Home Connect server.

As soon as a software update is available, you will be informed through the Home Connect app and will be able to start the software update via the app.

Once the update has been successfully downloaded, you can start installing it via the Home Connect app if you are on your local area network.

The Home Connect app will inform you once installation is complete.

#### Notes

- You can continue to use your extractor hood as normal while updates are downloading.
- Depending on your personal settings in the app, software updates can also be set to download automatically.
- We recommend that you install security updates as soon as possible.

### Resetting the connection

You can reset the connections you have saved on your home network and on Home Connect at any time.

Press and hold the and symbols at the same time until an audible signal sounds. When the audible signal is switched on, an audible signal sounds.

### About data protection

When your appliance is connected for the first time to a WLAN network, which is connected to the Internet, your appliance transmits the following categories of data to the Home Connect server (initial registration):

- Unique appliance identification (consisting of appliance codes as well as the MAC address of the installed WiFi communication module).
- Security certificate of the WiFi communication module (to ensure a secure IT connection).
- The current software and hardware version of your domestic appliance.
- Status of any previous resetting to factory settings.

This initial registration prepares the Home Connect functions for use and is only required when you want to use these Home Connect functions for the first time.

**Note:** Ensure that the Home Connect functions can be used only in conjunction with the Home Connect app. Information on data protection can be accessed in the Home Connect app.

### Declaration of Conformity

Constructa Neff Vertriebs-GmbH hereby declares that the appliance with functionality meets the basic requirements and other relevant provisions of Directive 2014/53/EU.

A detailed RED Declaration of Conformity can be found online at [www.neff-international.com](http://www.neff-international.com) among the additional documents on the product page for your appliance.

2.4 GHz band: max. 100 mW

5 GHz band: max. 100 mW

# Cleaning and maintenance

## ⚠ Warning – Risk of injury!

Items placed on the appliance may overload the fasteners, potentially causing the appliance to fall off the wall. Do not place items on the appliance.

## ⚠ Warning – Risk of electric shock!

Penetrating moisture may result in an electric shock. Clean the appliance using a damp cloth only. Before cleaning, pull out the mains plug or switch off the circuit breaker in the fuse box.

## ⚠ Warning – Risk of electric shock!

Do not use any high-pressure cleaners or steam cleaners, which can result in an electric shock.

## ⚠ Warning – Risk of injury!

Components inside the appliance may have sharp edges. Wear protective gloves.

## Cleaning agents

To ensure that the different surfaces are not damaged by using the wrong cleaning product, follow the instructions in the table. Do not use any of the following:

- Harsh or abrasive cleaning agents, e.g. scouring powder or liquid scouring cleaner,
- Cleaning products with a high alcohol content,
- Hard scouring pads or cleaning sponges,
- Pressure washers or steam cleaners,
- Cleaning products that dissolve limescale,
- Aggressive all-purpose cleaning products,
- Oven spray.

**Note:** Wash new sponge cloths thoroughly before use.

**Note:** Follow all instructions and warnings included with the cleaning products.

| Area                  | Cleaning products  |
|-----------------------|--|
| Stainless steel       | Hot soapy water:<br>Clean with a dish cloth and then dry with a soft cloth.<br><br>Clean stainless steel surfaces in the direction of the grain only.<br><br>Special stainless steel cleaning products are available from our after-sales service or from specialist retailers. ## Removing metal grease filter

1. Open the lock and swing down the metal grease filter. When you do this, take hold of the metal grease filter from underneath with your other hand.
2. Take the metal grease filter out of the holder.

### Notes

- Fat may accumulate in the bottom of the metal grease filter.
- Hold the metal grease filter level to prevent fat from dripping out.
- 3. Clean the metal grease filter.

- Clean the accessible parts of the housing. Clean the inside of the appliance.

### **⚠ Warning – Risk of injury!**

Components inside the appliance may have sharp edges. Wear protective gloves.

## Cleaning the metal mesh grease filters

These instructions apply to several appliance variants. It is possible that individual features are described which do not apply to your appliance.

### **⚠ Warning – Risk of fire!**

Fatty deposits in the grease filter may catch fire. Regularly clean the grease filter. Never operate the appliance without a grease filter.

#### Notes

- Do not use aggressive, acidic or alkaline cleaning products.
- We recommend cleaning the grease filters every 2 months.
- When cleaning the metal grease filters, also clean the metal grease filter holder in the appliance using a damp cloth.
- The metal grease filters can be cleaned in the dishwasher or by hand.

#### By hand:

**Note:** You can use a special degreaser to remove stubborn dirt. This can be ordered from the online shop.

- Soak the metal grease filters in hot soapy water.
- Clean the filters with a brush and then rinse them thoroughly.
- Leave the metal grease filters to drain on an absorbent material.

#### In the dishwasher:

**Note:** Slight discolouration may occur if the metal grease filters are cleaned in the dishwasher. This discolouration has no effect on the performance of the metal grease filters.

- Use normal domestic dishwashing detergents.
- Do not clean heavily soiled metal grease filters together with cookware.
- Place the metal grease filters in the dishwasher, leaving plenty of space around them. Do not trap the metal grease filters.
- Select a temperature of no more than 70 °C.

## Installing the metal mesh grease filter

- Insert the metal grease filter. When you do this, take hold of the metal grease filter from underneath with your other hand.  
**Note:** Make sure that the metal grease filter is positioned correctly.
- Swing the metal grease filter up and click it into place.

- If the metal grease filter has not been inserted correctly, open the lock and reinsert the metal grease filter correctly.

## Replacing the activated charcoal filter

**Note:** To bind odours in circulating-air mode, you must install an activated carbon filter. The different options for operating the appliance in circulating-air mode can be found in the brochure. Alternatively, ask your dealer. The required accessories are available from specialist retailers, from customer service or from the Online Shop.

- Open the cover on the top of the appliance.
- Remove the old activated charcoal filter and insert the new one.

- Close the cover.
- Reset the saturation indicator. → "Saturation display" on page 5

# ?

## Trouble shooting

Malfunctions often have simple explanations. Please read the following notes before calling the after-sales service.

### ⚠ Warning – Risk of electric shock!

Incorrect repairs are dangerous. Repairs may only be carried out and damaged power cables replaced by one of our trained after-sales technicians. If the appliance is defective, unplug the appliance from the mains or switch off the circuit breaker in the fuse box. Contact the after-sales service.

### Malfunction table

| Problem                                | Possible cause                | Solution   |
|--|-------------------------------|--|
| The appliance does not work            | The plug is not plugged in.   | Connect the appliance to the electricity supply                          |
|  | Power cut                     | Check whether other kitchen appliances are working                       |
|  | Faulty fuse                   | Check in the fuse box to make sure that the fuse for the appliance is OK |
| The lighting does not work.            | The LED lights are defective. | Call the after-sales service.  |
| The button illumination does not work. | The control unit is faulty.   | Call the after-sales service.  |

### LED lights

Defective LED lights may be replaced by the manufacturer, their customer service or a qualified technician (electrician) only.

### ⚠ Warning – Risk of injury!

The light emitted by LED lights is very dazzling, and can damage the eyes (risk group 1). Do not look directly into the switched on LED lights for longer than 100 seconds.

# 📞 Customer service

When calling us, please quote the product number (E no.) and the production number (FD no.) so that we can provide you with the correct advice. These numbers can be found on the rating plate on the top of the appliance (to access it, you will need to remove the activated charcoal filter).

You can make a note of the numbers of your appliance and the telephone number of the after-sales service in the space below to save time should it be required.

| E no.               | FD no. |
|---------------------|--------|
| After-sales service | 📞      |

Please be aware that a visit by an after-sales engineer will be charged if a problem turns out to be the result of operator error, even during the warranty period.

Please find the contact data of all countries in the enclosed customer service list.

### To book an engineer visit and product advice

|    |   |
|----|---|
| GB | 0344 892 8989   |
|    | Calls charged at local or mobile rate.                      |
| IE | 01450 2655  |
|    | 0.03 € per minute at peak.<br>Off peak 0.0088 € per minute. |

Rely on the professionalism of the manufacturer. You can therefore be sure that the repair is carried out by trained service technicians who carry original spare parts for your appliances.

### Accessories

(not included in the scope of delivery)

**Note:** These instructions apply to several appliance models. It may be the case that an optional accessory that is listed does not apply for your appliance.

**Note:** Observe the installation instructions in the accessory.

|  |           |
|--|-----------|
| Easy-change filter for CleanAir air recirculation module (cannot be regenerated) | Z5170X1   |
| Easy-change filter for CleanAir air-recirculation module (can be regenerated)    | Z50XXP0X0 |

# INSTALLATION INSTRUCTIONS

- This appliance is installed on the wall.
- Check the position of the screws using the enclosed template.
- Follow the enclosed installation instructions for additional special accessories (e.g. for circulating-air mode).
- The surfaces of the appliance are sensitive. Avoid damaging them during installation.

## ⚠ Important safety information

Read these instructions carefully. Only then will you be able to operate your appliance safely and correctly. Retain the instruction manual and installation instructions for future use or for subsequent owners.

Check the appliance for damage after unpacking it. Do not connect the appliance if it has been damaged in transport.

The appliance can only be used safely if it is correctly installed according to the safety instructions. The installer is responsible for ensuring that the appliance works perfectly at its installation location.

The surfaces of the appliance are easily damaged. Avoid damaging them during installation.

For the installation, observe the currently valid building regulations and the regulations of the local electricity and gas suppliers.

### ⚠ Warning – Risk of fire!

- Fatty deposits in the grease filter may catch fire. The specified safety clearances must be complied with in order to prevent a build-up of heat. Refer to the information provided for your cooker. If gas and electric hobs are being operated together, the largest specified clearance applies.
- Grease deposits in the grease filter may catch fire. Never work with naked flames close to the appliance (e.g. flambéing). Do not install the appliance near a heat-producing appliance for solid fuel (e.g. wood or coal) unless a closed, non-removable cover is available. There must be no flying sparks.

## **Warning – Risk of injury!**

- Components inside the appliance may have sharp edges. Wear protective gloves.
- The appliance may fall down if it has not been properly fastened in place. All fastening components must be fixed firmly and securely.
- The appliance is heavy. To move the appliance, 2 people are required. Use only suitable tools and equipment.
- Changes to the electrical or mechanical assembly are dangerous and may lead to malfunctions. Do not make any changes to the electrical or mechanical assembly.

## **Warning – Risk of electric shock!**

- Components inside the appliance may have sharp edges. These may damage the connecting cable. Do not kink or pinch the connecting cable during installation.
- It must always be possible to disconnect the appliance from the electricity supply. The appliance must only be connected to a protective contact socket that has been correctly installed.

The mains plug of the mains power cable must be easily accessible after installation of the appliance. If this is not possible, an all-pole isolating switch must be integrated into the permanent electrical installation according to the conditions of overvoltage category III and according to the installation regulations.

The permanent electrical installation must only be wired by a professional electrician. We recommend installing a residual-current circuit breaker (RCCB) in the appliance's power supply circuit.

## **Warning – Risk of electric shock!**

Incorrect repairs are dangerous. Repairs may only be carried out and damaged power cables replaced by one of our trained after-sales technicians. If the appliance is defective, unplug the appliance from the mains or switch off the circuit breaker in the fuse box. Contact the after-sales service.

## **Warning – Danger of suffocation!**

Packaging material is dangerous to children. Never allow children to play with packaging material.

# General information

## **Checking the wall**

- The wall must be level, vertical and adequately load-bearing.
- The depth of the bore holes must be the same length as the screws. The wall plugs must have a secure grip.
- The enclosed screws and wall plugs are suitable for solid brickwork. Suitable fasteners must be used for other structures (e.g. plasterboard, porous concrete, poroton bricks).
- The maximum weight of the extractor hood is **approx. 10 kg**.

## **Electrical connection**

### **Warning – Risk of electric shock!**

Components inside the appliance may have sharp edges. These may damage the connecting cable. Do not kink or pinch the connecting cable during installation.

The required connection data can be found on the rating plate inside the appliance; to do this, remove the metal mesh grease filter.

### **Length of the cable: approx. 1.30 m**

This appliance complies with the EC interference suppression regulations.

### **Warning – Risk of electric shock!**

It must always be possible to disconnect the appliance from the electricity supply. The appliance must only be connected to a protective contact socket that has been correctly installed.

The mains plug of the mains power cable must be easily accessible after installation of the appliance. If this is not possible, an all-pole isolating switch must be integrated into the permanent electrical installation according to the conditions of overvoltage category III and according to the installation regulations.

The permanent electrical installation must only be wired by a professional electrician. We recommend installing a residual-current circuit breaker (RCCB) in the appliance's power supply circuit.

# Installation

## Preparing for installation

### Caution!

Ensure that there are no electrical wires, gas pipes or water pipes in the area where holes are to be drilled.

1. Determine where the extractor hood should be positioned and lightly mark where the lower edge of the appliance should be on the wall. Determine where the middle should be based on the hob.  
**Note:** We recommend fitting the extractor hood such that the lower edge of the appliance is in line with the lower edges of the adjacent wall-hung cabinets. Make sure that the specified safety clearances from the hob are complied with.
2. Place the template against the line drawn on the wall. Mark where the screws should be inserted.
3. Drill three 8 mm diameter holes to a depth of 80 mm for fastening the appliance and press in the wall plugs flush with the wall.

## Preparing the appliance

1. Remove the activated charcoal filter from the film.
2. Open the cover on the top of the appliance and remove it **A**, insert the activated charcoal filter **B** and then close the cover.

## Installation

- Screw in the mounting supports for the extractor hood until they are hand-tight, use a spirit level to level the appliance and then screw the mounting supports in fully.

- Screw in the threaded bolt, leaving it protruding out of the wall by **5 - 9 mm**.

## Hanging the appliance

- If there is any protective film on the appliance, first remove the protective film from the back and, following installation, remove the rest of the film.
- Remove the metal grease filter before hanging the appliance.
- Hang the appliance on the wall.
- Firmly tighten the knurled nuts.

- Reinsert the metal grease filter and connect the power supply.
