Home Connect – Amazon Alexa

Amazon Alexa is a voice service which brings hands-free living to your home, letting you control your Home Connect appliances using your voice.

To use voice control with an Amazon Alexa device, you need to **download a 'skill'** for each appliance category within the Amazon Alexa app. Example skills available include: Home Connect Oven and Home Connect Coffee Machine. Please see page five of this document for instructions on how to download each 'skill'.

You are able to use commands through voice, including turning the appliance on and stopping the appliances. You can find examples of these commands on pages two - four of this document.

Amazon Alexa – Oven Commands

Commands help a user control their Home Connect appliance using their voice.
"Alexa" must be said before each command.

How to set up Amazon Alexa with your Home Connect Appliance

To get started on your smartphone or tablet, download the **Amazon Alexa app** and create an account. Next, ensure your **Home Connect app** is connected to your appliances. Then follow the below steps to connect the Amazon Alexa app to your Home Connect appliance.
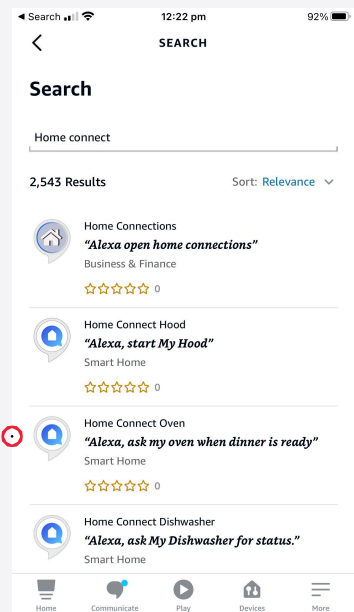

1. Open the Amazon Alexa app.
Click 'More' then 'Skills & Games'.
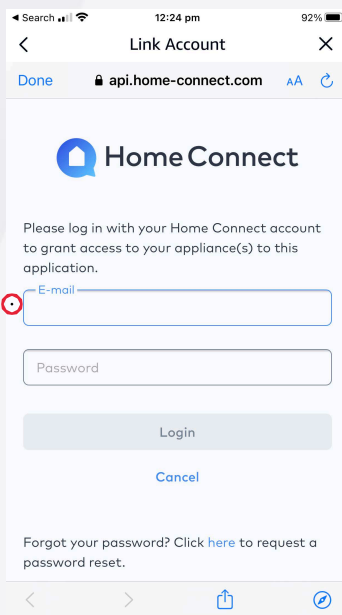

2. Search 'Home Connect'.

3. Select the 'skills' you'd like to use.
You need to download a 'skill' for each appliance category . Example skills: Home Connect Oven, Home Connect Coffee Machine.

4. Select 'Enable to use'.

5. Login to your 'Home Connect' account.

6. Select 'Approve' and you are ready to go!
