

Home Connect – Google Assistant

Google Assistant is a voice service which brings hands-free living to your home, letting you control your Home Connect appliances using your voice.

See page four of this document for instructions on how to connect Google Assistant to your Home Connect appliance.

Google Assistant has **commands** as well as **monitoring queries**.

You are able to use basic commands through voice, including turning the appliance on and stopping the appliances, but also query Google Assistant about whether the appliance is turned on and whether the appliance is running. You can find examples of these commands on the next page of this document.

Google Assistant - Commands

Commands help a user control their Home Connect appliance using their voice. **"Hey Google"** must be said before each command.

Home Connect	Voice Command	Google Response	Supported Appliance Types
Turn On/Off	Turn my { deviceName } on/off?	Sure, turning the { <mark>deviceName</mark> } on/off	Oven Coffee Machine Dishwasher Hood
Start selected program	Start the {deviceName}	Sure, starting the { <mark>deviceName</mark> }	Oven Coffee Machine Dishwasher Hood Washer Dryer

Google Assistant - Monitoring Queries

Monitoring queries help a user understand what their device is currently doing, so you can ask Google whether your Home Connect enabled appliances are turned on, running or what program is running.

"Hey Google" must be said before each monitoring query.

Home Connect	Voice Command	Google Response	Supported Appliance Types
Power State	Is my {deviceName} on/off?	The { deviceName } is on/off	Dishwasher Dryer Hood Oven Washer Coffee Machine
Operation State	Is my {deviceName} running/ paused?	The { deviceName } is running/ paused	Dishwasher Dryer Hood Oven Washer Coffee Machine
