Most efficient programmes for cotton fabrics

The following programmes (standard programmes, indicated by ) are suitable for cleaning normally soiled cotton fabrics and are the most efficient with respect to combined energy and water consumption.

Standard programmes for Cottons in accordance with the directive (EU) no. 1015/2010		
Programme + Temperature + Button	Load	Programme duration
Cottons +  °C +  Eco Perfect 	8 kg	4 h
Cottons +  °C +  Eco Perfect 	4 kg	4 h
Cottons +  °C +  Eco Perfect 	4 kg	4 h
Programme setting for testing and energy labelling in accordance with Directive 2010/30/EU with cold water (15 °C). The specification of the programme temperature is based on the temperature stated on the care label in the fabrics. The actual washing temperature may deviate from the stated programme temperature for energy-saving reasons.
