17 Technical data...... 25

1 Safety

Observe the following safety instructions.

1.1 General information

- Read this instruction manual carefully.
- Keep the instruction manual and the product information safe for future reference or for the next owner.
- Do not connect the appliance if it has been damaged in transit.

1.2 Intended use

This appliance is only intended to be fully fitted in a kitchen. Only use this appliance:

- For chilling food.
- In private households and in enclosed spaces in a domestic environment.
- Up to an altitude of max. 2000 m above sea level.

1.3 Restriction on user group

This appliance may be used by children aged 8 or over and by people who have reduced physical, sensory or mental abilities or inadequate experience and/or knowledge, provided that they are supervised or have been instructed on how to use the appliance safely and have understood the resulting dangers.

Children must not play with the appliance.

Cleaning and user maintenance must not be performed by children unless they are being supervised.

Children above the age of three years old and younger than eight years old may load and unload the the fridge-freezer.

1.4 Safe transport

⚠ WARNING – Risk of injury!

The high weight of the appliance may result in injury when lifted.

▶ Do not lift the appliance on your own.

1.5 Safe installation

Improper installation is dangerous.

- ► Connect and operate the appliance only in accordance with the specifications on the rating plate.
- ► Connect the appliance to a power supply with alternating current only via a properly installed socket with earthing.
- ► The protective conductor system of the domestic electrical installation must be properly installed.
- ► Never equip the appliance with an external switching device, e.g. a timer or remote control.
- ▶ When the appliance is installed, the mains plug of the power cord must be freely accessible. If free access is not possible, an all-pole isolating switch must be installed in the permanent electrical installation according to the installation regulations.
- ▶ When installing the appliance, check that the power cable is not trapped or damaged.

If the insulation of the power cord is damaged, this is dangerous.

▶ Never let the power cord come into contact with heat sources.

⚠ WARNING – Risk of explosion!

If the appliance's ventilation openings are sealed, a leak in the refrigeration circuit may result in a flammable mixture of gas and air.

► Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.

It is dangerous to use an extended power cord and non-approved adapters.

- ▶ Do not use extension cables or multiple socket strips.
- ▶ If the power cord is too short, contact Customer Service.
- ▶ Only use adapters approved by the manufacturer.

Portable multiple socket strips or portable power supply units may overheat and cause a fire.

▶ Do not place portable multiple socket strips or power supply units on the back of the appliance.

1.6 Safe use

An ingress of moisture can cause an electric shock.

- ▶ Only use the appliance in enclosed spaces.
- ▶ Never expose the appliance to intense heat or humidity.
- ▶ Do not use steam- or high-pressure cleaners to clean the appliance.

⚠ WARNING – Risk of suffocation!

Children may put packaging material over their heads or wrap themselves up in it and suffocate.

- ► Keep packaging material away from children.
- ► Do not let children play with packaging material. Children may breathe in or swallow small parts, causing them to suffocate.
- ► Keep small parts away from children.
- ▶ Do not let children play with small parts.

⚠ WARNING – Risk of explosion!

Mechanical devices, e.g. sharp or pointed objects, or other devices may damage the refrigeration circuit; flammable refrigerant may escape and explode.

► To accelerate the defrosting process, do not use any other mechanical devices or devices other than those recommended by the manufacturer.

Products which contain flammable propellants and explosive substances may explode, e.g. spray cans.

▶ Do not store products which contain flammable propellants (e.g. spray cans) or explosive substances in the appliance.

Electrical devices within the appliance may cause a fire, e.g. heaters or electric ice makers.

▶ Do not operate electrical devices within the appliance.

⚠ WARNING – Risk of injury!

Containers that contain carbonated drinks may burst.

▶ Do not store containers that contain carbonated drinks in the cool-fresh compartment.

Injury to the eyes caused by escaping flammable refrigerant and hazardous gases.

▶ Do not damage the tubes of the refrigerant circuit or the insulation.

To prevent food from being contaminated, you must observe the following instructions.

- ▶ If the door is open for an extended period of time, this may lead to a considerable temperature increase in the compartments of the appliance.
- ▶ Regularly clean the surfaces that may come into contact with food and accessible drain systems.
- ► Store raw meat and fish in suitable containers in the refrigerator so that they do not touch or drip on other food.
- ▶ If the fridge/freezer is empty for an extended period of time, switch off the appliance, defrost it, clean it and leave the door open to prevent the formation of mould.

Metal or metal-style parts in the appliance may contain aluminium. If acidic food comes into contact with aluminium in the appliance. aluminium foil ions may pass into the food.

▶ Do not consume soiled food.

1.7 Damaged appliance

MARNING − Risk of electric shock!

If the appliance or the power cord is damaged, this is dangerous.

- ▶ Never operate a damaged appliance.
- ▶ Never pull on the power cord to unplug the appliance. Always unplug the appliance at the mains.
- ▶ If the appliance or the power cord is damaged, immediately unplug the power cord or switch off the fuse in the fuse box.
- ► Call customer services. → Page 25

en Safety

Incorrect repairs are dangerous.

- ► Repairs to the appliance should only be carried out by trained specialist staff.
- ▶ Only use genuine spare parts when repairing the appliance.
- ▶ If the power cord of this appliance is damaged, it must be replaced by the manufacturer, the manufacturer's Customer Service or a similarly qualified person in order to prevent any risk.

⚠ WARNING – Risk of fire!

If the tubes are damaged, flammable refrigerant and harmful gases may escape and ignite.

- Keep naked flames and ignition sources away from the appliance.
- ▶ Ventilate the room.
- ► Switch off the appliance. → Page 16
- ▶ Unplug the appliance from the mains or switch off the circuit breaker in the fuse box.
- ► Call after-sales service. → Page 25

2 Preventing material damage

ATTENTION!

Using the base, runners or appliance doors as a seat surface or climbing surface may damage the appliance.

- ▶ Do not stand or support yourself on the base, runners or doors. Contamination with oil or fat may cause plastic parts and door seals to become porous.
- ► Keep plastic parts and door seals free of oil and grease.

Metal or metal-style parts in the appliance may contain aluminium. Aluminium reacts when it comes into contact with acidic foods.

Do not store unpackaged food in the appliance.

3 Environmental protection and saving energy

3.1 Disposing of packaging

The packaging materials are environmentally compatible and can be recvcled.

 Sort the individual components by type and dispose of them separately.

3.2 Saving energy

If you follow these instructions, your appliance will use less power.

Selecting the installation location

- Keep the appliance out of direct sunlight.
- Install the appliance as far away as possible from heating elements, cookers and other heat sources:

- Maintain a 30 mm clearance to electric or gas cookers.
- Maintain a 300 mm clearance to oil or solid-fuel cookers.
- Use a niche depth of 560 mm.
- Never cover or block the exterior ventilation grilles.

Saving energy during use

Note: The arrangement of the fittings does not affect the energy consumption of the appliance.

- Open the appliance only briefly.
- Never cover or block the interior ventilation openings or the exterior ventilation grilles.
- Transport purchased food in a cool bag and place in the appliance quickly.
- Allow warm food and drinks to cool down before storing them.
- Thaw frozen food in the refrigerator compartment to utilise the low temperature of the food.
- Always leave some space between the food and to the back panel.

4 Installation and connection

You can find out where and how best to install your appliance here. You will also learn how to connect your appliance to the power supply.

4.1 Scope of delivery

After unpacking all parts, check for any transport damage and for completeness of delivery.

If you have any complaints, contact your dealer or our after-sales service → Page 25.

The delivery consists of the following:

Built-in appliance

- Equipment and accessories¹
- Installation material
- Installation instructions
- User manual
- Customer service directory
- Warranty enclosure²
- Energy label
- Information on energy consumption and noises

4.2 Criteria for the installation location

⚠ WARNING Risk of explosion!

If the appliance is in a space that is too small, a leak in the refrigeration circuit may result in a flammable mixture of gas and air.

Only install the appliance in a space with a volume of at least 1 m³ per 8 g refrigerant. The volume of refrigerant is indicated on the rating plate. → "Appliance", Fig. 1/7, Page 13

The weight of the appliance ex works may be up to 70 kg depending on the model.

The subfloor must be sufficiently stable to bear the weight of the appliance.

Permitted room temperature

The permitted room temperature depends on the appliance's climate class.

The climate class can be found on the rating plate. → "Appliance", Fig.

1 / 7 . Page 13

Climate class	Permitted room temperature
SN	10 °C to 32 °C
Ν	16 °C to 32 °C
ST	16 °C to 38 °C
Т	16 °C to 43 °C

The appliance is fully functional within the permitted room temperature. If an appliance with climate class SN is operated at colder room temperatures, the appliance will not be damaged up to a room temperature of 5 °C.

Niche dimensions

Observe the niche dimensions if you install your appliance in the niche. If this is not the case, problems may occur when installing the appliance.

Niche depth

Install the appliance in the recommended niche depth of 560 mm. If the niche depth is smaller, the energy consumption increases slightly. The niche depth must be a minimum 550 mm.

Niche width

An inside niche width of at least 560 mm is required for the appliance.

4.3 Installing the appliance

 Install the appliance in accordance with the enclosed installation instructions

4.4 Preparing the appliance for the first time

1. Remove the informative material.

¹ Depending on the appliance specifications

² Not in all countries

- 2. Remove the protective foil and transit bolts, e.g. remove the adhesive strips and carton.
- 3. Clean the appliance for the first time. → Page 18

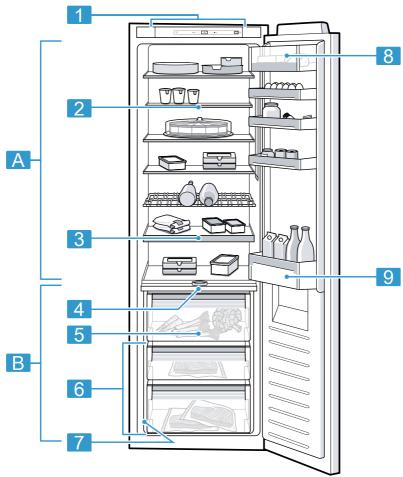

4.5 Connecting the appliance to the electricity supply

- 1. Insert the mains plug of the appliance's power cable in a socket nearby.
 - The connection data of the appliance can be found on the rating plate. → "Appliance", Fig. 11/7, Page 13
- 2. Check the mains plug is inserted properly.
- ▼ The appliance is now ready for use.

5 Familiarising yourself with your appliance

5.1 Appliance

You can find an overview of the parts of your appliance here.

- A Refrigerator compartment

 → Page 17
- B Cool-fresh compartment

 → Page 17
- 1 Control panel → Page 13
- 2 Variable shelf → Page 14
- 3 Extendable shelf → Page 14

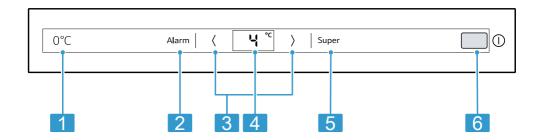

- Partition with humidity controller → Page 14
- Fruit and vegetable container → Page 14
- Cool-fresh container → Page 15
- Rating plate → Page 25

- 8 Butter and cheese compartment → Page 15
- Door storage compartment for large bottles → Page 15

Note: Deviations between your appliance and the diagrams may differ with regard to their features and size.

5.2 Control panel

You can use the control panel to configure all functions of your appliance and to obtain information about the operating status.

- 2
- 0°C lights up when the appliance is operating.
- Alarm switches the warning signal off.
- Displays the set temperature for the refrigerator compartment in °C.
- ⟨/⟩ sets the temperature of the 4 refrigerator compartment.
- Super switches Super cooling on or off.
- ① switches the appliance on or off.

6 Features

The features of your appliance depend on the model.

6.1 Shelf

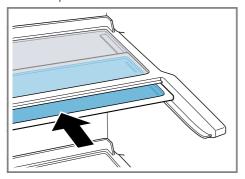

To vary the shelf as required, you can remove the shelf and re-insert it elsewhere.

→ "Removing the shelf", Page 19

6.2 Variable shelf

Use the variable shelf to store tall items, e.g. cans or bottles, on the shelf below.

You can remove the front section of the variable shelf and slide it below the rear part of the shelf.

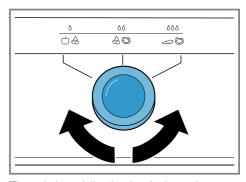

6.3 Extendable shelf

In order to achieve an improved overview and to remove food more quickly, pull out the extendable shelf.

6.4 Fruit and vegetable container

Store fresh fruit and vegetables in the fruit and vegetable container. You can adjust the humidity in the fruit and vegetable container via the humidity controller on the partition and a special seal.

The air humidity in the fruit and vegetable container can be set according to the type and amount of food to be stored by turning the humidity control:

- Medium humidity & required for a mixed load.
- High humidity
 Orequired when primarily storing vegetables or when the appliance is not very full.

Condensation may form in the fruit and vegetable container depending on the food and quantity stored. Remove the condensation with a dry cloth and adjust the air humidity using the humidity controller.

To ensure that the quality and aroma are retained, store fruit and vegetables that are sensitive to cold outside of the appliance at temperatures of approx. 8 °C to 12 °C, e.g. pineapple, bananas, citrus fruits, cucumbers, courgettes, peppers, tomatoes and potatoes.

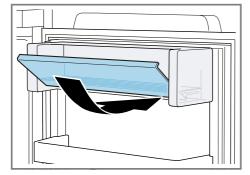

6.5 Cool-fresh container

Use the lower temperatures in the cool-fresh container to store highly perishable food, e.g. fish, meat and sausages.

6.6 Butter and cheese compartment

Store butter and hard cheese in the butter and cheese compartment. To open the butter and cheese compartment, press down lightly on the centre of the flap.

Note: The compartment opens downwards. The flap slides under the compartment

6.7 Door rack

To adjust the door racks as required, you can remove the door rack and re-insert elsewhere.

→ "Removing door rack", Page 19

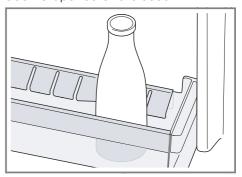

6.8 Accessories

Use original accessories. These have been made especially for your appliance.

The accessories for your appliance depend on the model.

Bottle holder

The bottle holder prevents bottles from falling over when the appliance door is opened and closed.

7 Basic operation

7.1 Switching on the appliance

- 1. Press ①
- ▼ The appliance begins to cool.
- 2. Set the required temperature. → Page 16

7.2 Operating tips

- Once you have switched on the appliance, the set temperature is only reached after several hours. Do not put any food in the appliance until the set temperature has been reached.
- The housing to the left, the right and beneath the cool-fresh compartment may heat up slightly temporarily. This prevents condensation in the area of the door seal.
- When you close the door, a vacuum may be created. The door is then difficult to open again. Wait a moment until the vacuum is offset.

7.3 Switching off the appliance

► Press ①.

7.4 Setting the temperature

Setting the refrigerator compartment temperature

 Press (/) repeatedly until the temperature display shows the required temperature.

The recommended temperature in the refrigerator compartment is 4 °C

Setting the cool-fresh compartment temperature

Note: The standard setting of the cool-fresh compartment is preset at 0. Setting 0 corresponds to a temperature of around 0 °C. You can set the temperature in the cool-fresh compartment to 3 settings warmer or colder.

Tip: If frost forms on the food items in the cool-fresh compartment, set a higher cool-fresh compartment temperature.

- 1. Press and hold Super until the temperature display flashes.
- 2. Press \(\frac{1}{2}\) to change the setting.
 - Setting –3 corresponds to the coldest setting.
 - Setting +3 corresponds to the warmest setting.
- The selected setting is saved after one minute.

8 Additional functions

8.1 Super cooling

With Super cooling, the refrigerator compartment cools as cold as possible.

Switch on Super cooling before placing large quantities of food.

Note: When Super cooling is switched on, increased noise may occur.

Switching on Super cooling

- Press Super.
- Super lights up.

Note: After approx. 15 hours, the appliance switches to normal operation.

Switching off Super cooling

- ▶ Press Super.
- The previously set temperature is displayed.

9 Alarm

9.1 Door alarm

If the appliance door is open for a longer period, the door alarm switches on.

Switching off the door alarm

- ► Close the appliance door or press
- → The warning tone is switched off.

10 Refrigerator compartment

You can keep dairy products, eggs, prepared meals, pastries, open preserves and hard cheese in the refrigerator compartment.

The temperature can be set from 3 °C to 8 °C.

The refrigerator compartment can also be used to store highly perishable foods in the short to medium term. The lower the selected temperature, the longer the food remains fresh.

10.1 Tips for storing food in the refrigerator compartment

- Only store food when fresh and undamaged.
- Store food covered or in air-tight packaging.
- Allow hot food and drinks to cool down first before placing in the appliance.
- Observe the best-before date or use-by date specified by the manufacturer.

10.2 Chill zones in the refrigerator compartment

The air circulation in the refrigerator compartment creates different chill zones.

Coldest zone

The coldest zone is on the partition and in the door rack for large bottles.

Tip: Store highly perishable food such as fish, sausages and meat in the cool-fresh compartment. → "Cool-fresh compartment". Page 17

Warmest zone

The warmest zone is at the very top of the door.

Tip: Store food that does not spoil easily in the warmest zone, e.g. hard cheese and butter. Cheese can then continue to release its aroma and the butter will still be easy to spread.

11 Cool-fresh compartment

In the cool-fresh compartment, you can keep fresh food fresh up to three times longer than in the refrigerator compartment.

The temperature in the cool-fresh compartment is kept at around 0 °C. Storing food in the fresh compartment retains the quality of the food better. The low temperature and the optimum moisture provide ideal storage conditions for fresh food.

11.1 Storage times in the cool-fresh compartment at 0 °C

The storage times are dependent on the original quality of your food.

Food	Storage time
Fresh fish, seafood	up to 3 days
Poultry, meat (boiled/fried)	up to 5 days
Beef, pork, lamb, sausage (cold meat)	up to 7 days
Smoked fish, broccoli	up to 14 days
Salad greens, fennel, apricots, plums	up to 21 days

en Defrosting

Food	Storage time
Soft cheese, yoghurt, quark, buttermilk, cauliflower	up to 30 days

12 Defrosting

12.1 Defrosting in the refrigerator compartment

The refrigerator compartment in your appliance defrosts automatically.

12.2 Defrosting in the coolfresh compartment

The cool-fresh compartment in your appliance defrosts automatically.

13 Cleaning and servicing

To keep your appliance working efficiently for a long time, it is important to clean and maintain it carefully. Customer Service must clean inaccessible points. Cleaning by customer service can give rise to costs.

13.1 Preparing the appliance for cleaning

- 1. Switch off the appliance.
 - → Page 16
- 2. Disconnect the appliance from the power supply.
 - Unplug the appliance from the mains or switch off the circuit breaker in the fuse box.
- **3.** Take out all of the food and store it in a cool place.

- Place ice packs (if available) onto the food.
- **4.** If there is a layer of hoarfrost, allow this to defrost.
- 5. Remove all fittings and accessories from the appliance.
 - → *Page 19*
- 6. Remove the partition. → Page 20
- 7. Remove the cover. → Page 20
- 8. Remove the telescopic rails.

→ Page 21

13.2 Cleaning the appliance

⚠ WARNING Risk of electric shock!

An ingress of moisture can cause an electric shock.

 Do not use steam- or high-pressure cleaners to clean the appliance.

Liquid in the lighting or in the controls can be dangerous.

► The rinsing water must not drip into the lighting or controls.

ATTENTION!

Unsuitable cleaning products may damage the surfaces of the appliance.

- ▶ Do not use hard scouring pads or cleaning sponges.
- Do not use harsh or abrasive detergents.
- ► Do not use cleaning products with a high alcohol content.

If you clean fittings and accessories in the dishwasher, this may cause them to become deformed or discol-

- ► Never clean fittings and accessory in the dishwasher.
- Prepare the appliance for cleaning.
 → Page 18

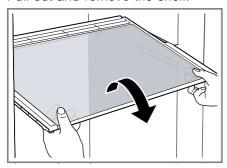

- 2. Clean the appliance, the fittings, the accessories, the components and the door seals with a dish cloth, lukewarm water and a little pH-neutral washing-up liquid.
- 3. Dry thoroughly with a soft, dry cloth.
- 4. Insert the fittings and install the appliance components.
- 5. Electrically connect the appliance.
- 6. Switch on the appliance.
 - → Page 15
- **7.** Putting the food into the appliance.

13.3 Removing the fittings

If you want to clean the fittings thoroughly, remove these from your appliance.

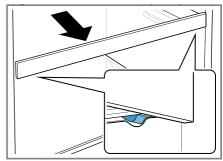

Removing the shelf

Pull out and remove the shelf.

Removing the extendable shelf

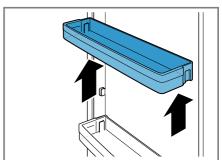

1. Firmly pull out the extendable shelf until the locking catch is released.

2. Lower the shelf and swing it out to the side.

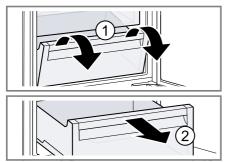

Removing door rack

▶ Lift the door rack and remove it.

Removing the fruit and vegetable container

► Tilt the fruit and vegetable container forwards ① and remove it ②.

Removing the cool-fresh container

► Tilt the cool-fresh container forwards ① and remove it ②.

13.4 Removing appliance components

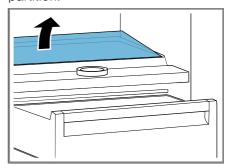

If you want to clean your appliance thoroughly, you can remove certain components from your appliance.

Partition and cover of the fruit and vegetable container

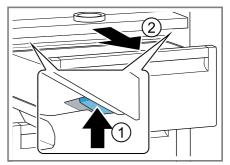

You can remove the partition and the cover of the fruit and vegetable container in order to clean it thoroughly.

Removing the partition

1. Remove the glass plate from the partition.

- 2. Remove the fruit and vegetable container.
- 3. Press the lever on the underside on both sides ① and pull the partition forwards ②.

4. Lift the partition and swivel it out to the side.

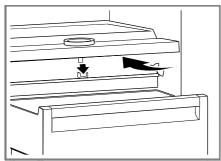

Removing the cover

Lift the cover of the fruit and vegetable container, pull it forwards and swivel it out to the side.

Fitting the partition and cover

1. Insert the cover for the fruit and vegetable container.

2. Insert the partition.

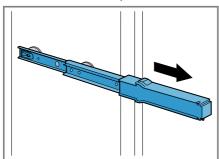

3. Place the glass plate on the partition.

Telescopic rails

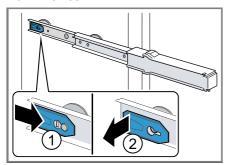

You can remove the telescopic rails in order to clean them thoroughly.

Removing telescopic rails

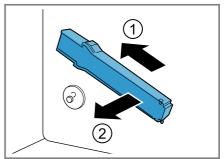

1. Pull out the telescopic rail.

2. Move the lock in the direction of the arrow 1 and loosen the pin from the rear 2.

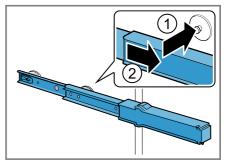

- 3. Push in the telescopic rail.
- 4. Push the telescopic rail backwards above the rear pin 1 and disengage 2.

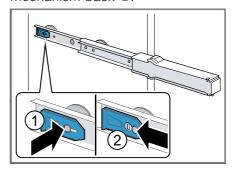

Installing telescopic rails

1. Place the extended telescopic rail on the front pin 1 and pull it forwards slightly to lock in place 2.

2. Place the telescopic rail on the rear pin 1 and push the locking mechanism back 2.

14 Troubleshooting

You can rectify minor faults on your appliance yourself. Read the troubleshooting information before contacting after-sales service. This will avoid unnecessary costs.

⚠ WARNING

Risk of electric shock!

Incorrect repairs are dangerous.

- ► Repairs to the appliance should only be carried out by trained specialist staff.
- ▶ Only use genuine spare parts when repairing the appliance.
- ▶ If the power cord of this appliance is damaged, it must be replaced by the manufacturer, the manufacturer's Customer Service or a similarly qualified person in order to prevent any risk.

Fault	Cause and troubleshooting
The appliance is not cooling, the displays and lighting light up.	Showroom mode is switched on. ► Carry out the appliance self-test. → Page 24 ✓ Once the appliance self-test has ended, the appliance switches to normal operation.
The LED lighting does not work.	► Call customer service.
	The customer service number can be found in the enclosed customer service directory.
E or d appears in the temperature display.	 The electronics have detected a fault. Switch off the appliance. → Page 16 Disconnect the appliance from the mains. Unplug the appliance from the mains or switch off the circuit breaker in the fuse box. Reconnect the appliance after five minutes. If the message still appears on the display, call customer service. The customer service number can be found in the enclosed customer service directory.
A warning signal sounds and Alarm lights up.	Different causes are possible. ► Press Alarm. ✓ The alarm is switched off. The appliance door is open. ► Close the appliance door.

Fault	Cause and troubleshooting
The temperature differs greatly from the setting.	 Different causes are possible. 1. Switch off the appliance. → Page 16 2. Switch the appliance back on after five minutes. → Page 15
	 If the temperature is too warm, check the temperature again after a couple of hours. If the temperature is too cold, check the temperature again on the following day.
The appliance hums, bubbles, buzzes, gargles or clicks.	Not a fault. A motor is running, e.g. refrigerating unit, fan. Refrigerant flows through the pipes. The motor, switches or solenoid valves are switching on or off. No action required.
The appliance makes noises.	Fittings wobble or stick. ► Check the removable fittings and, if required, replace these.
	Bottles or containers are touching. ► Move the bottles or containers away from each other.

14.1 Conducting an appliance self-test

- 1. Switch off the appliance.
 - → Page 16
- 2. Switch the appliance back on after approx. five minutes. → Page 15
- Within the first 10 seconds after switching on, press and hold Super 3 to 5 seconds.
- The appliance self-test starts.
- While the appliance self-test is running, a long audible signal sounds.
- If, at the end of the appliance selftest, two audible signals sound and the temperature display indicates the set temperature, your appliance is OK. The appliance switches to normal operation.
- If, at the end of the appliance selftest, five audible signals sound and Super flashes for 10 seconds, inform the after-sales service.

15 Storage and disposal

You can find out here how to prepare your appliance for storage. You will also find out how to dispose of old appliances.

15.1 Taking the appliance out of operation

- Switch off the appliance.
 → Page 16
- 2. Disconnect the appliance from the power supply.
 - Unplug the appliance from the mains or switch off the circuit breaker in the fuse box.
- 3. Remove all of the food.
- 4. Defrost the appliance. → Page 18
- 5. Clean the appliance. → Page 18

6. To guarantee the ventilation inside the appliance, leave the appliance open.

15.2 Disposing of old appliance

Valuable raw materials can be reused by recycling.

⚠ WARNING Risk of harm to health!

Children can lock themselves in the appliance, thereby putting their lives at risk.

- ► Leave shelves and containers inside the appliance to prevent children from climbing in.
- ► Keep children away from the redundant appliance.

⚠ WARNING Risk of fire!

If the tubes are damaged, flammable refrigerant and harmful gases may escape and ignite.

- Do not damage the tubes of the refrigerant circuit or the insulation.
- **1.** Unplug the appliance from the mains.
- 2. Cut through the power cord.
- Dispose of the appliance in an environmentally friendly manner.
 Information about current disposal methods are available from your specialist dealer or local authority.

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and elec-

tronic appliances (waste electrical and electronic equipment - WEEE). The auideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

16 Customer Service

If you have any queries, are unable to rectify faults on the appliance yourself or if your appliance needs to be repaired, contact Customer Service. Function-relevant genuine spare parts according to the corresponding Ecodesign Order can be obtained from Customer Service for a period of at least 10 years from the date on which your appliance was placed on the market within the European Economic Area

Note: Under the terms of the manufacturer's warranty applicable to the location, the use of Customer Service is free of charge. The minimum duration of the warranty (manufacturer's warranty for private consumers) in the European Economic Area is 2 vears according to the terms of warranty applicable to the location. The terms of warranty do not affect other rights or claims held by yourself under local legislation.

Detailed information on the warranty period and terms of warranty in your country is available from our aftersales service, your retailer or on our website.

If you contact Customer Service, you will require the product number (E-Nr.) and the production number (FD) of your appliance.

The contact details for Customer Service can be found in the enclosed Customer Service directory or on our website.

16.1 Product number (E-Nr.) and production number

You can find the product number (E-Nr.) and the production number (FD) on the appliance's rating plate.

→ "Appliance", Fig. 11/7, Page 13 Make a note of your appliance's details and the Customer Service telephone number to find them again auickly.

17 Technical data

Refrigerant, cubic capacity and further technical specifications can be found on the rating plate.

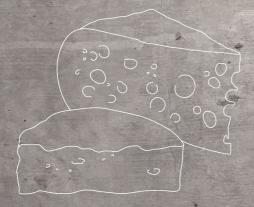

→ "Appliance", Fig. 1 / 7 , Page 13 More information about your model can be found online at https://energylabel.bsh-group.com¹. This web address is linked to the official EU EPREL product database. At the time of printing its web address had not vet been published. Please then follow the instructions on searching for models. The model identifier is made up of the characters before the slash in the product number (E-Nr.) on the rating plate. Alternatively you can also find the model identifier in the first line of the EU energy label.

Only applies to countries in the European Economic Area
